

Brian Leip - Portfolio Project - React

Personal Portfolio Website - UX

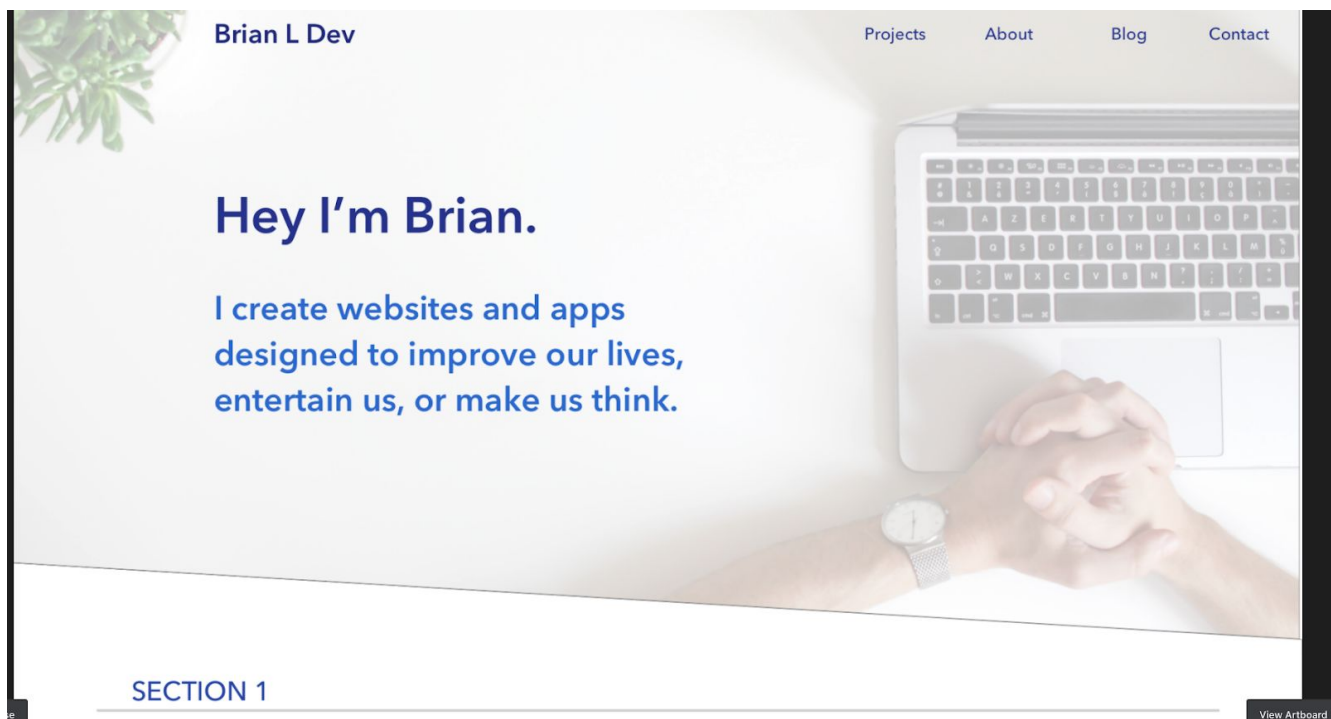

1. Introduction

- Quick recap from previous project proposal:
 - I'm creating a Portfolio Website that shows various projects I've completed, info about me, along with some blog articles.
- Design/UX
 - Using the Sketch design app for design as well as prototyping.

2. User Interface Design and Prototype

- After completing a few Sketch tutorials and demo projects, I put together the following interactive prototype:

<https://www.sketch.com/s/50a7d35d-0270-4ce9-8fcd-17395f61237a/a/zw7RYW/play>

SECTION 2

Let's Connect

 brianldev@gmail.com

 @brianldev

3. Navigation Structure

- The home page will have a fixed navbar at the top with links to the other pages:
 - Projects
 - About
 - Blog
 - Contact
- It will also have “Brian L Dev” (my developer name) in the upper left displayed similar to company branding. If you click the name, it takes you back to the home page.
