Brian Leip - Portfolio Project - React Native

Goals Tracker - Proposal

Project Overview
- For this project, I'll be creating a goal tracking mobile app with React Native.
- Users will be able to create goals and track their progress using the SMART method (Specific, Measurable, Achievable, Realistic, Time-Based)
- I realize that the full completion of this app will require a database, which won't be covered in until later in the back-end course, but I should be able to get the front-end set up for this portion of the project.

1. **Expected List of React Components**
   - Home page
   - Login
   - Goals page
     - Create and delete goals here
     - View open and completed goals
   - Goal details

2. Team responsibilities
- N/A since this is a solo project
